John Douglas ...

IN THIS, our latest catalogue, will be found illustrations of "Douglas" water closet fixtures of every description including our Niagara and Niagara Junior (Flushometer) Valve combination, which have given such universal satisfaction since put on the market.

We are also showing an up-to-date line of lavatories made of Vitreous China ware, which ware is rapidly taking the place of all other material now used for lavatory purposes.

We manufacture the woodwork, brass work, and earthenware, at our own plants and are in no sense jobbers of our fixtures. We are therefore in a position to safely guarantee our products in their entirety.

The superiority of the Douglas water closets has been generally acknowledged in the past year or two by the number of cheap and inferior imitations which have been offered to the plumber.

We show a most complete line of seat-action water closet fixtures, both in low down and high up tank styles, for school buildings and other institutions.

We shall be pleased to furnish architects or owners upon request a list of buildings in which our goods are installed, lack of space alone not permitting us to include such a large list in our catalogue.

Thanking all our friends for their patronage, we are

The John Douglas Company.

"Yale" Low Down Combination,

With Royal Tank.

Plate 1 D.

Plate 1 D includes Paneled Low Down Tank, **Veneered,** with Flush Connection and Iron Pipe Size Supply Pipe with Nickel-plated Compression Stopcock and with Flange at Floor; No. 335-D **Saddle-hole** Seat and Lid with Concealed Heavy Cast Brass Hinges; "Douglas" Vitreous China Plain **Ventilated** "Yale" Syphon Jet Bowl, with Nickel-plated Brass Wall Flange.

Sectional View of "Excelsis" Seat-Action Low Down Combination.

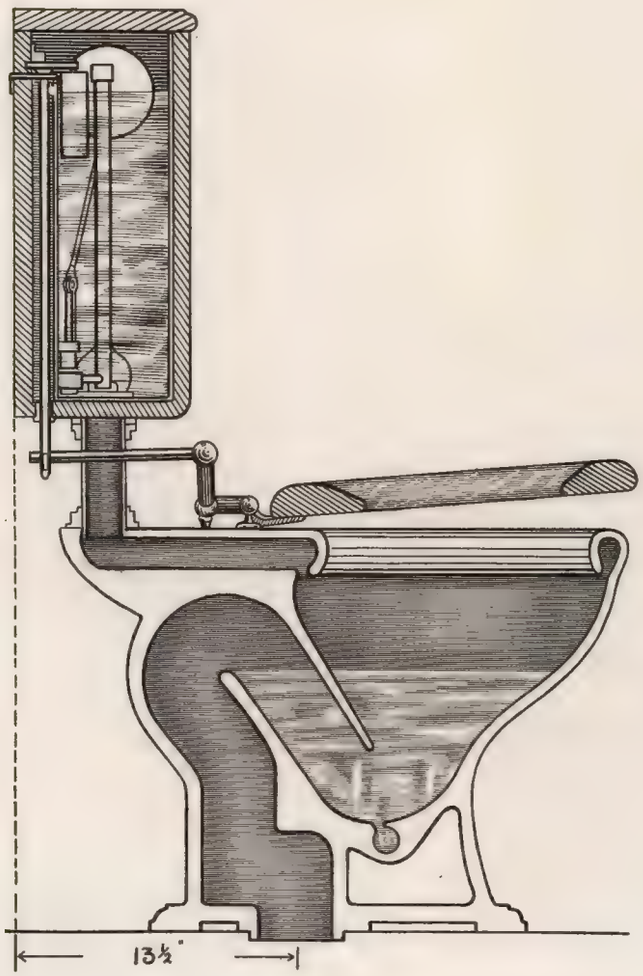

Plate 19 D.

This Fixture will be found to surpass all others of this type in simplicity of working parts, absolute certainty of action, and sanitary qualities.

In setting the Fixture, allow the Tank to rest on seat arm when seat is pressed down on Bowl. This will give the proper height from Floor to Bottom of Tank.

These Seat-action Trimmings can be used with any of our Low Down Combinations at an additional charge of $8.50.

"Excelsis Junior" Low Down Combination.

Sectional View of

"Capitol" Combination,

Showing Tank Behind Partition.

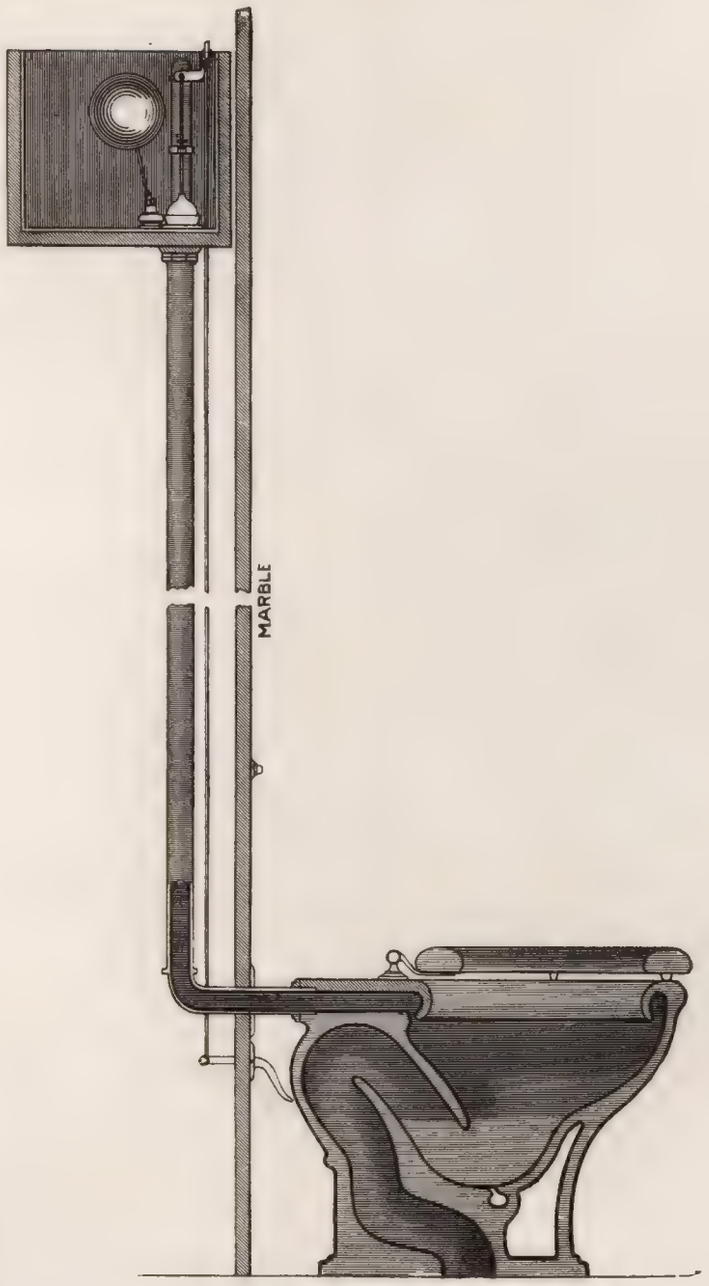

Plate 89 D.

This Combination has been especially designed for use in Office Buildings. In such buildings a Fixture is desired where the Working Parts are concealed as much as possible. We call attention to the ease with which the Fixture can be operated by means of a Curved Lever Handle, which will not get out of order. We call the attention of Architects, Superintendents and Owners of such Buildings to the merits of this Fixture.

We can fit any of our High Tank Combinations in a similar manner.

For Price see Page 73.

"Success" Combination.

This fixture is made to conform to specifications issued by the United States Government. The bowl is as per specifications, Type B 1-2.

It is guaranteed to carry through under test a solid ball 2⅝ inches in diameter.

Price as Described, ... $50.00

Add for Brass Bend to Floor $2 50

When Ordering, Please Specify Finish of Wood and Give Plate Number.

Vitreous China Floor Slab.

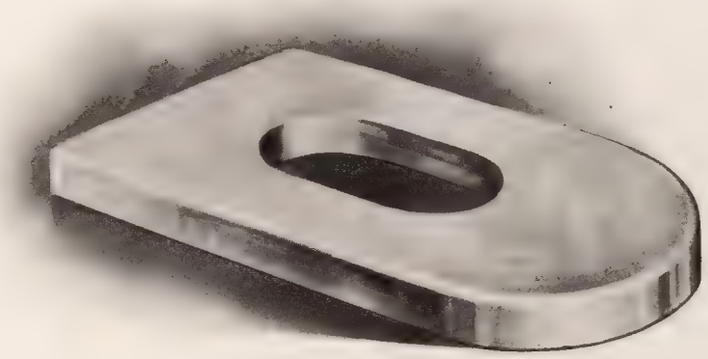

Plate 126 D.

List Price, ... $4.00

This Floor Slab can be furnished with any of our Bowls. We are, we believe, the First Ones to put on the Market a Floor Slab in **Vitreous China**, and wish you to distinguish carefully between this Floor Slab and the one which has been made for some time in Heavy Porcelain.

Vitreous China is far superior to both Porcelain and Marble, and is recognized by Sanitary Experts as being the best material yet discovered for this purpose.

Vitreous China is guaranteed against Crazing and Fire Cracks.

When Ordering, Please Specify for what Bowl required, and if for use with Screw Joint Outlet Connection; Floor Flange Screwed for Iron Pipe, Durham System; or regular Floor Flange.

The "O. K." Screw Joint Closet Connection.

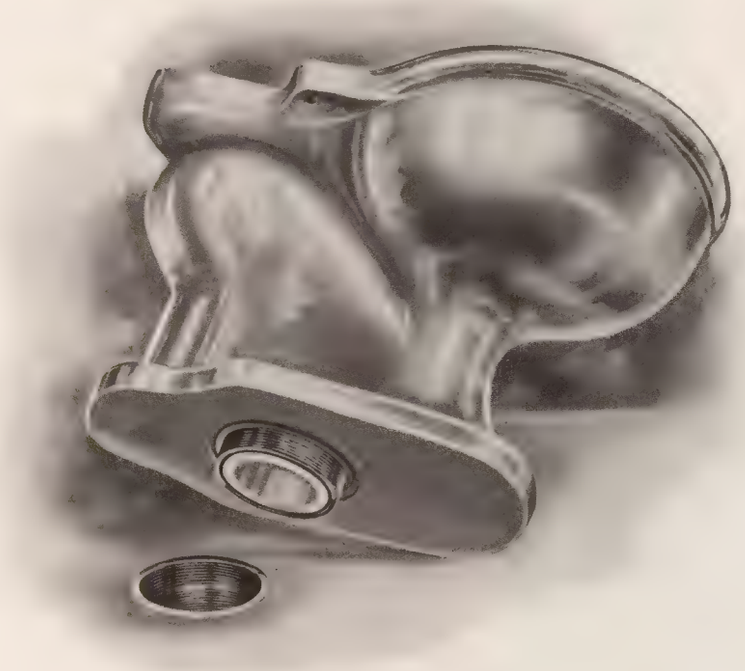

Plate 127 D.

Plate 127 D shows the "O. K." Screw Joint Connection complete, with Floor Thimble which can be used with any of our Bowls.

List Price, ... **$5.00**

We consider our "O. K." Screw Joint Closet connection superior to anything of the kind now on the Market. All other connections of this character require the assistance of Cement, Rubber or Asbestos to form the Joint to the Base of the Bowl. Our Screw Joint connection is Caulked directly to the Closet Outlet or Horn, with Lead.

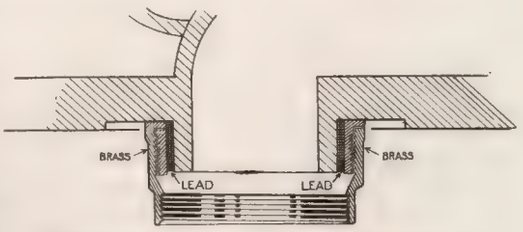
The Lead is well Caulked to a depth of 1½ inches, which makes the Brass connection not only practically an integral part of the Closet, but positively non-removable, except by Breaking the Closet.

The Thimble is set Flush with the Floor, with the Side marked "Front" towards the Front.

The Closet is Screwed into the Threaded connection until the Base rests on the Floor. It may be removed at any time by simply unscrewing it, the same as other similar connections. The same Thimble is used for Lead or Iron Pipe.

Note:—Our "O. K." Screw Joint connection does away with all exposed Bolts through the Base of the Water Closet; in fact there are no Bolts of any kind in connection with same.

On account of a few changes in roughing in measurements, when using this connection, kindly communicate with us before roughing in.



Outline sketch showing Screw Joint connection Caulked to Base of "Gloria" Closet.

"Havana" Combination.

Plate 129 D.

Plate 129 D includes No. 254-D 19 x 10 x 10-inch Tank with Cone Valve; Nickel-plated Flush and Supply Pipes with No. 460-D Double Band; No. 523-D Nickel-plated Brass Elbow; No. 329-D Seat and Lid; "Douglas" Vitreous China Plain "Havana" Syphon Washdown Bowl.

Plate 146 D includes No. 248-D 19 x 11 x 11-inch Automatic Tank with large Valve ; No. 422-D Nickel-plated Brass Clover Leaf Angle Brackets and Iron Top Clamps ; Nickel-plated three way distributing piece, with two branching Flush Pipes and one straight Flush Pipe ; three Nickel-plated Brass Inlet Connections ; three Nickel-plated Brass Outlet Connections ; " Douglas " Vitreous China "Yale" Ventilated Syphon Jet Urinals with Nickel-plated Brass Urinal Bolts.

Woodwork of Tank, Quartered Oak, Natural or Antique Finish.

Price as Described, ... $99.50

Add for Genuine Cherry Tank $1 50

Measurements:–

From Floor to Center of Outlet Connection	10½ inches.
From Floor to Center of Vent	2 feet, 3¼ "
From Center of Inlet Connection to Center of Outlet Connection,	2 " 7 "
From Center to Center of Flush Pipes	2 " 1 "
Outside diameter of Vent	3 "
Inside diameter of Vent	2¼ "
Outside diameter of Inlet Connection	1⅛ "
Outside diameter of Outlet Connection	2⅜ "

For Sectional View see Plate 141-D.

Prices do not include Marble or Marble Fittings.

When Ordering, Please Specify Finish of Wood and Give Plate Number.

One Stall Urinal,

"Arrow" Syphon Jet Urinal Combination,

With Pull Tank.

Plate 147 D.

Plate 147 D includes 15 x 7 x 10-inch "Douglas" Tank with Rod, Horizontal Pull and "Pull" Notice; No. 420-D Nickel-plated Cast Brass Angles and Iron Top Clamps; Nickel-plated 1-inch Flush Pipe; Brass Inlet Elbow Connection; Brass Outlet Elbow Connection; "Douglas" Vitreous China "Arrow" Syphon Jet Urinal with Vitreous China Inlet and Outlet in Front of Marble.

Woodwork of Tank, Quartered Oak, Natural or Antique Finish.

Price as Described, ... $34.25

Price does not include Marble or Marble Fittings.

For Sectional View and Measurements, see Plate 148-D.

When Ordering, Please Specify Finish of Wood and Give Plate Number.

One Stall Urinal,

"Arrow" Syphon Jet Urinal Combination,

With Automatic Tank.

Plate 148 D.

Plate 148 D includes No. 246-D 8 x 10 x 10-inch Automatic Tank; No. 420-D Nickel-plated Cast Brass Angles and Iron Top Clamps; Nickel-plated 1-inch Flush Pipe; Brass Inlet Elbow Connection; Brass Outlet Elbow Connection; "Douglas" Vitreous China "Arrow" Syphon Jet Urinal with Vitreous China Inlet and Outlet in Front of Marble.

Woodwork of Tank, Quartered Oak, Natural or Antique Finish.

Price as Described, ... $33.00

Price does not include Marble or Marble Fittings.

For Sectional View and Measurements, see Next Page 129.

When Ordering, Please Specify Finish of Wood and Give Plate Number.

Sectional View of

"Arrow" Syphon Jet Urinal Combination,

With Automatic Tank.

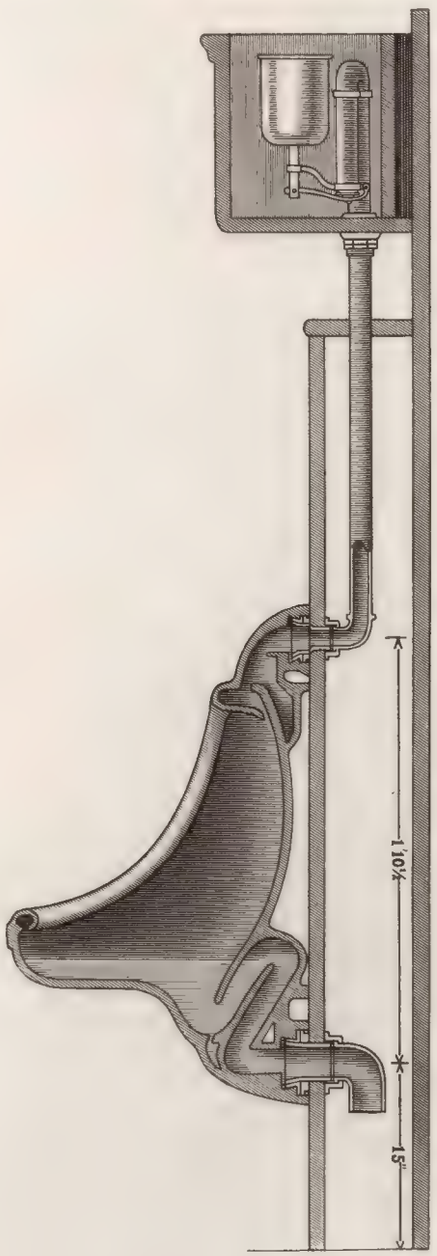

Plate 148 D.

This Syphon Jet Urinal is an Improvement over any Urinal yet devised, in the respect that it does away with the Exposed Brass Work. The Sanitary Qualities in all our Syphon Jet Urinals cannot be excelled. Our Automatic Tank has no Superior on the Market.

Note :—Size of Hole in Marble for Inlet Elbow 1⅞ inches.
Size of Hole in Marble for Outlet Elbow 1½ inches.

Two Stall Urinal,

"Arrow" Syphon Jet Urinal Combination,

With Automatic Tank.

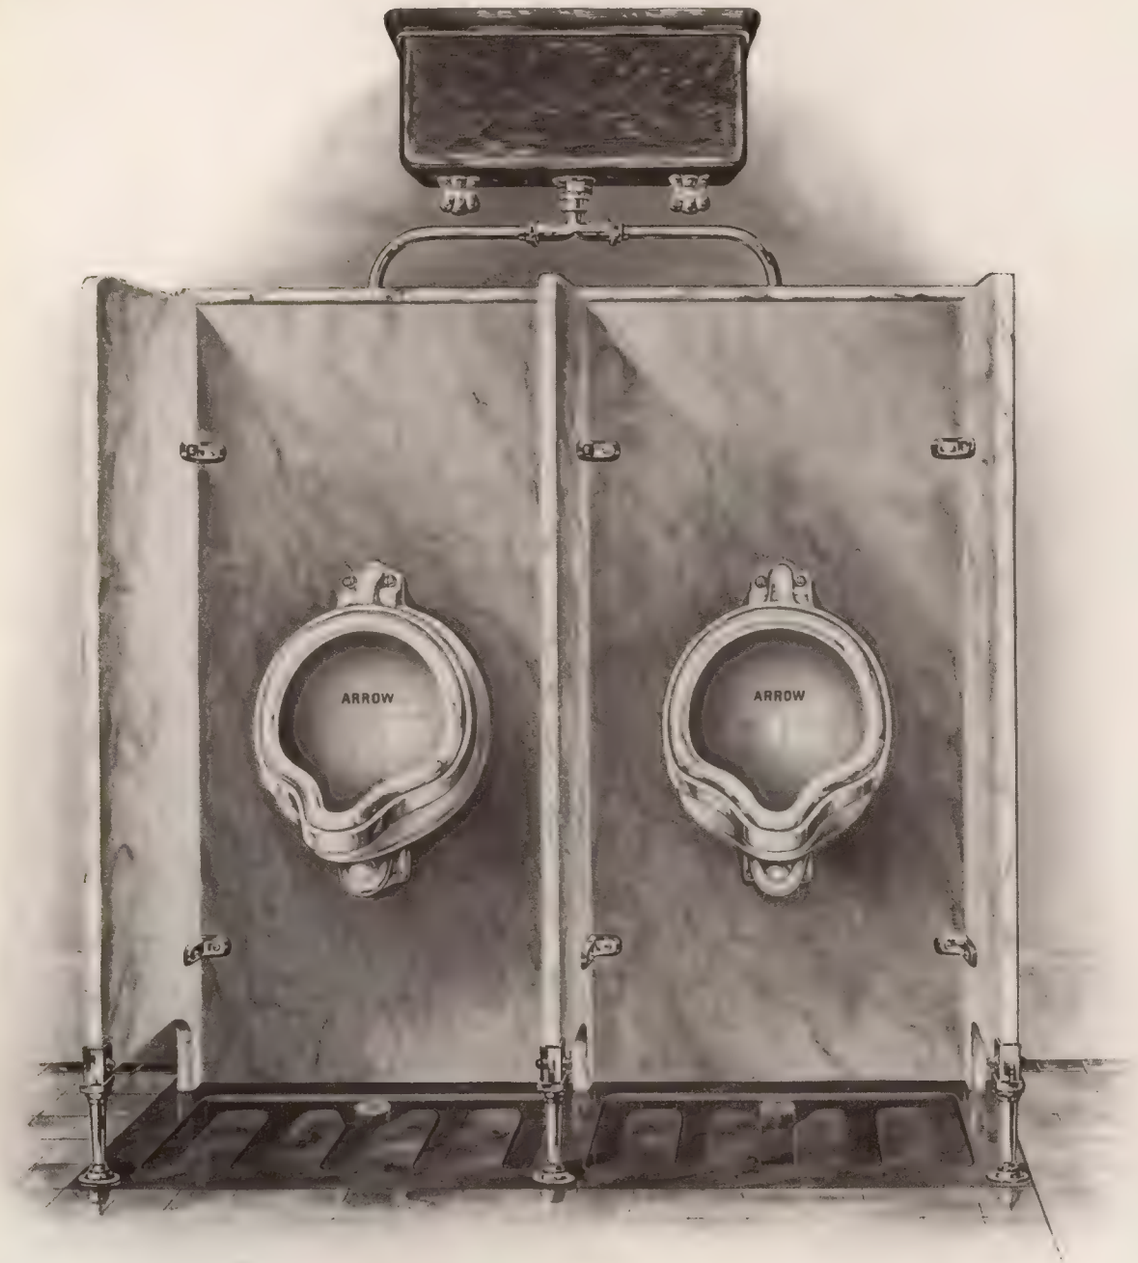

Plate 149 D.

Plate 149 D includes No. 247-D 18 x 8 x 10-inch Automatic Tank; No. 422-D Nickel-plated Brass Angle Brackets and Iron Top Clamps; Nickel-plated Brass Two Way Distributing Piece with Branching 1-inch Flush Pipes; Two Brass Inlet Elbow Connections; Two Brass Outlet Elbow Connections; Two "Douglas" Vitreous China "Arrow" Syphon Jet Urinals with Vitreous China Inlets and Outlets in Front of Marble.

Woodwork of Tank, Quartered Oak, Natural or Antique Finish.

Price as Described,	$58.00
Price of Three Stall Urinal,	76.50

Price does not include Marble or Marble Fittings.

Note:—Measurement from Center to Center of Flush Pipes 2 feet, 1-inch.

For Sectional View and other Measurements, see Plate 148-D.

When Ordering, Please Specify Finish of Wood and Give Plate Number.

One Stall Urinal,

"Cornell" Ventilated Syphon Jet Urinal Combination,

With Pull Tank.

Plate 151 D.

Plate 151 D includes 15 x 7 x 10-inch "Douglas" Tank with Rod, Horizontal Pull and Pull Notice; No. 420-D Nickel-plated Brass Angles and Iron Top Clamps; Nickel-plated 1-inch Flush Pipe; Brass Inlet Elbow Connection; Brass Outlet Elbow Connection; "Douglas" Vitreous China "Cornell" **Ventilated** Syphon Jet Urinal with Hood and Vent and with Vitreous China Inlet and Outlet in front of Marble.

Woodwork of Tank, Quartered Oak, Natural or Antique Finish.

Price as Described, ... $36.50

Price does not include Marble or Marble Fittings.

For Sectional View and Measurements, see Plate 152-D.

When Ordering, Please Specify Finish of Wood and Give Plate Number.

One Stall Urinal,

"Cornell" Ventilated Syphon Jet Urinal Combination.

With Automatic Tank.

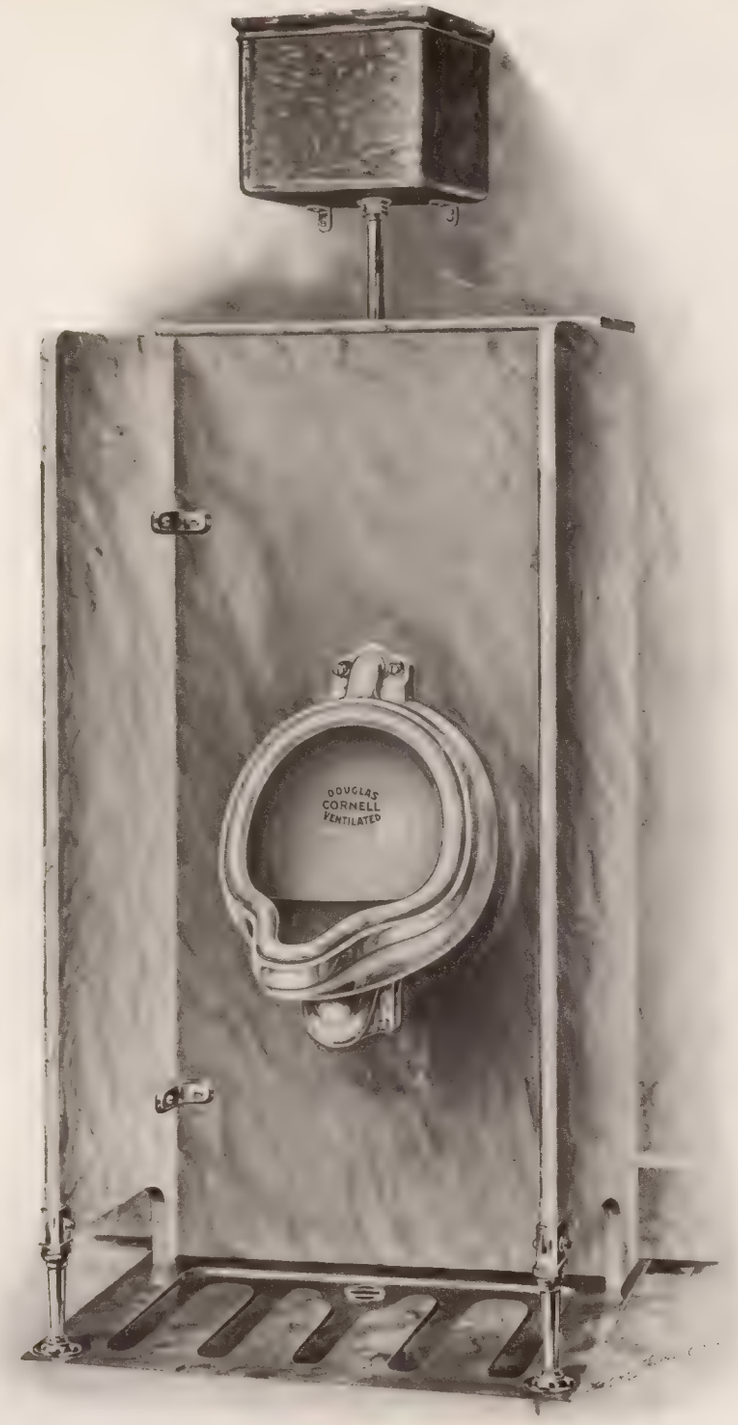

Plate 152 D.

Plate 152 D includes No. 246-D 8x10x10-inch Automatic Tank; No. 420-D Nickel-plated Brass Angles and Iron Top Clamps; Nickel-plated 1-inch Flush Pipe; Brass Inlet Elbow Connection; Brass Outlet Elbow Connection; "Douglas" Vitreous China "Cornell" **Ventilated** Syphon Jet Urinal with Hood and Vent and with Vitreous China Inlet and Outlet in Front of Marble.

Woodwork of Tank, Quartered Oak, Natural or Antique Finish.

Price of One Stall Urinal, as described	$35.00
Price of Two Stall Urinal	63.00
Price of Three Stall Urinal	83.00

Prices do not include Marble or Marble Fittings.

For Sectional View and Measurements, see Next Page.

When Ordering, Please Specify Finish of Wood and Give Plate Number.

Sectional View of

"Empire" Syphon Jet Urinal Combination.

With Automatic Tank.

Plate 167 D.

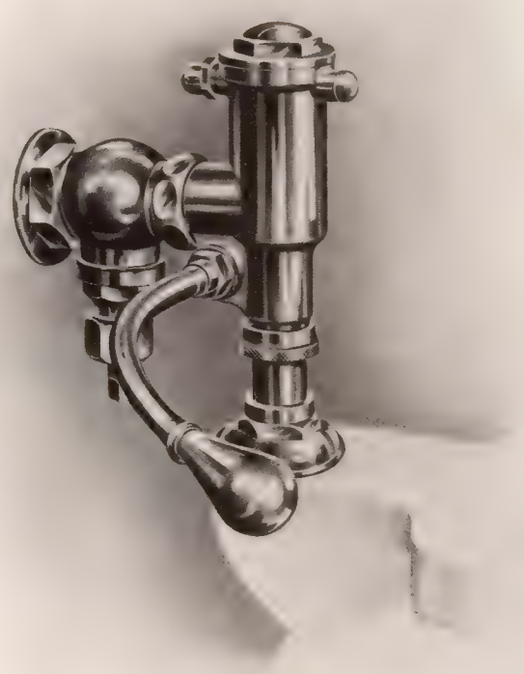
This Syphon Jet Urinal is intended to meet the requirements for a smaller size Urinal than regular and is especially suitable for Schools and similar Buildings. The Syphon Action is perfect and the Vitreous China Inlet and Outlet in front of the Marble does away with Exposed Brass Work.

Note—Size of Hole in Marble for Inlet Elbow 1¾ inches. Size of Hole in Marble for Outlet Elbow 2½ inches.

The Douglas "Niagara" Flush Valve,

For Water Closets.



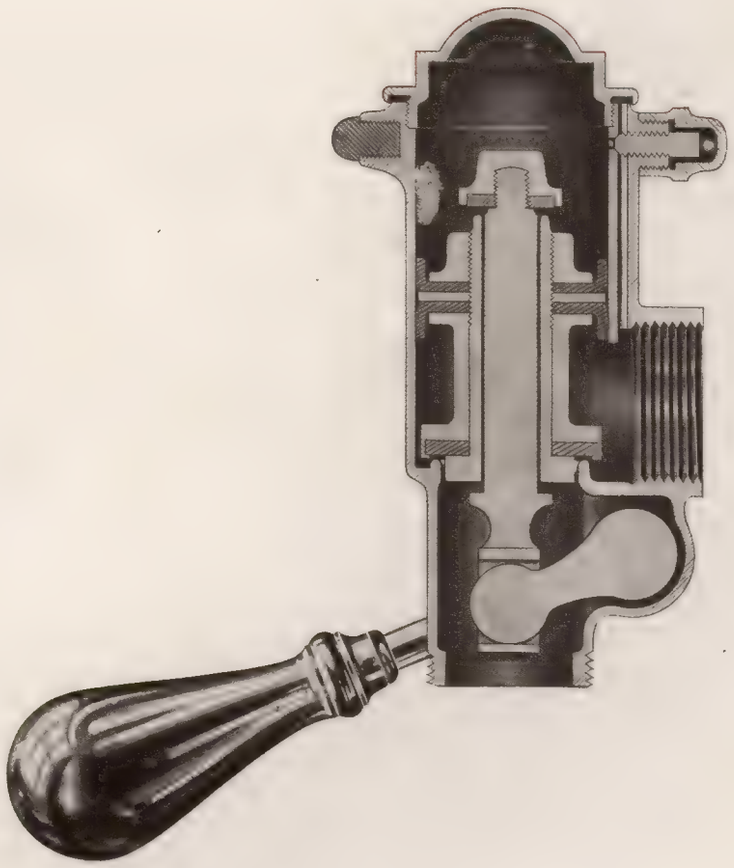
In designing The Douglas "Niagara" Flush Valve for Water Closets we have kept in view the importance of avoiding close working parts, as metal pistons must necessarily be fitted so accurately to the cylinder that they are sure to be affected by corrosion, grit and muddy water. Our valve therefore overcomes the objections which have been made to other flushing valves.

The Douglas "Niagara" Flush Valve does not depend upon the pressure to operate it, but opens and closes by means of the weighted lever independently of the water pressure.

The valve will operate under house or street pressure from 3 to 150 lbs., without noise or water hammer. It is simple in construction and has no weak parts to get out of order. It can be regulated while the water is turned on to give any duration of flush desired. It is compact and symmetrical in appearance, and we recommend it as the best and most desirable flushing valve yet devised.

Sectional View of

The "Niagara" Flush Valve.



for Water Closets.

Instructions for Installing and Using

The Douglas "Niagara" flush Valve,

for Water Closets.

1. In all cases the Stop Valve should be used, unless the Pressure is below 10 lbs., in order to regulate the pressure and insure a Uniform Flush.

2. In estimating the size of the House Tank to use, figure on the probable number of Niagara Flush Valves likely to be in use at any one time, and allow 10 gallons to each Valve. The actual amount of water used for each Valve can be much less than 10 gallons; but it is necessary to figure on 10 gallons on account of the difficulty in determining the number of Valves likely to be in use at one time. If the House Tank is only filled at Night, it will be necessary to allow 10 to 12 gallons to each Niagara Flush Valve in the building, unless the conditions are such that all are not likely to be used during the Day. A small individual Tank should never be used to supply the Valve. The Minimum Capacity of an Auxilliary Individual Tank, when such is used, should be from 10 to 15 gallons, according to the Water Supply.

   In estimating the Pressure on the Niagara Flush Valve, figure $\frac{434}{1000}$ of a pound to the foot in height; for instance, a House Tank set 50 feet above the Niagara Flush Valves, would carry a pressure of about 22 pounds. In the same manner an estimate can be made of pressures on different floors. The size of the Supply Pipe to Valve does not regulate the pressure in any way, but the height of the Tank only.

   The Niagara Flush Valve can also be used on direct Street Pressure without requiring any House Tank, but it is very necessary to use the Stop Valve, owing to the probable high pressure or variation in the pressure. Be sure to have the Supply Pipe of the proper size.

3. The size of the Supply Pipe to Valve should be as follows:
   1½-inch for a pressure of 3 to 10 lbs.
   1¼-inch for a pressure of 10 to 35 lbs.
   1-inch for a pressure of 35 to 70 lbs.
   ⅝-inch or ¾-inch I. P. size for a pressure of 75 lbs. or over.

4. Do not use Oil or Grease on the Plunger under any circumstances.
   The Cup Leathers should remain as sent out, viz: dry.

5. The Regulating Valve is located on Back of Flush Valve. Unscrew the Cap and turn regulating Screw from Left to Right to obtain a longer Flush; turn regulating Screw from Right to Left to decrease or shorten the Flush. The Valve will take care of the afterfill itself without further adjustment.

6. After the Water Supply has been turned on, raise the Handle and allow the Valve to run for two or three minutes so as to wash out any Chips or Waste Material in the Pipes.

"Yale" Combination,

With "Niagara" Flush Valve.

Plate 171 D.

Plate 171 D includes "Niagara" Flush Valve with Stop-valve and Coupling Ring and Flange; No. 335-D Saddle Hole Seat and Lid, Quartered Oak, with Concealed Hinges; "Douglas" Vitreous China "Yale" Ventilated Syphon Jet Bowl, with Wall Flange.

Price as Described, ... $55.00

Plate 180 D includes "Niagara" Flush Valve with Stop-valve; No. 333-D Seat and Lid, Quartered Oak; No. 523-D Nickel-plated Brass Elbow; "Douglas" Vitreous China "Record" Syphon Jet Washdown Bowl.

Price as Described, ... $33.00

Roughing in Measurements:

From Face of Finished Wall to Center of Outlet of Bowl, 14 inches.
From Floor to Center of Supply to Valve . . . 21¼ "

Order by Plate Number.

The Douglas "Niagara Junior" Flush Valve for Urinals.

Directions for Installing the "Niagara Junior" Flush Valve for Urinals.

1. The Size of Supply Pipe to Valve should be as follows:
   ¾-inch for a Pressure up to 15 lbs.
   ½-inch for a Pressure of 15 to 30 lbs.
   ⅜-inch for a Pressure of 30 to 60 lbs.
   ¼-inch for a Pressure of 60 lbs. or over.
2. The Stop-valve is not absolutely necessary if the proper size Supply is used; but on a Pressure of over 30 lbs. would advise its use, or if the Supply is larger than above Sizes in Relation to the Pressure.
3. When the "Niagara Junior" Valve has been Installed, unscrew the Top Cap and remove the Plunger and allow the Water to run through the Valve so as to Remove the Waste or Chips which have accumulated in the pipes.
4. With the above exceptions the same Rules should be Observed in Installing the "Niagara Junior" Valve for Urinals as applies to the Niagara Flush Valve for Water Closets, full Instructions regarding which will be found by referring to Page 142.

"Torrent" Syphon Jet Urinal Combination,

With "Niagara Junior" Flush Valve.

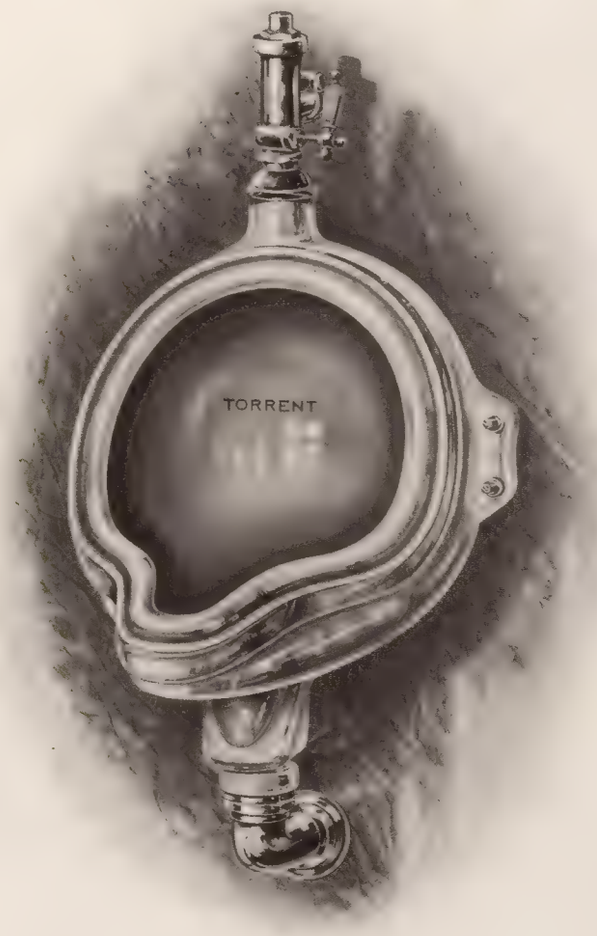

Plate 185 D.

Plate 185 D includes "Niagara Junior" Flush Valve with Coupling Ring and Flange; Nickel-plated Brass Elbow Outlet Connection; "Douglas" Vitreous China "Torrent" Syphon Jet Urinal with Nickel-plated Brass Urinal Bolts.

Price as Described, ... $33.00

If with Stop-valve, add $3 50

Measurements:

Douglas Vitreous Ware Lavatories.

IN calling attention to our line of Vitreous China Ware Lavatories we wish to emphasize the fact that our lavatories are guaranteed against crazing or dunting, and are non-absorbent. We wish to have you distinguish carefully between **Vitreous China** and **Heavy Porcelain.** Vitreous China, of which our lavatories are made, is solid throughout the entire body, whereas heavy porcelain ware is not, and will discolor, and in time absorb, besides not holding the proper proportions like Vitreous China.

Vitreous China Lavatories are far superior in every respect to anything yet devised for lavatory purposes, and are now so recognized by sanitary experts. :: :: :: :: :: :: :: :: :: :: :: :: ::

We will continue to add to the line from time to time so as to provide lavatories suitable for all classes of buildings. :: :: :: :: :: ::

All brass work furnished is our own manufacture, heavy, simple and thoroughly guaranteed. All lavatories are properly ground and fitted before shipping. :: :: :: :: :: :: :: :: :: :: :: :: ::

Douglas Vitreous Ware Lavatories,
The "Victor" No. 1.

Plate 1001 D.

Plate 1001 D includes Douglas Vitreous Ware Lavatory, the "Victor" No. 1; Nickel-plated "Regal" Combination Waste and Cocks with China Handles; Nickel-plated 1¼-inch "Alpha" Trap to Wall with Vent and Offset; Two Wall Supports; two ⅜-inch Iron Pipe Size Supply Pipes without Air Chambers and with Wheel Handle Compression Stopcocks.
